

TOPLINE AD

„I decide:
Striking design throughout.“

The Quality Profile
★★★★★★

TOPLINE AD

UPVC windows made from VEKA profiles benefit any house. The bold design of the TOPLINE system with its chamfered edges and clear lines adds a special touch to any architectural style, whether modern or traditional, newly built or renovated. And the technology inside is a perfect match: complex 5-chamber profiles take advantage of the insulating properties of air to fulfil the most demanding heat retention requirements. So you will experience a comfortable, balanced atmosphere whatever the weather and succeed in significantly reducing your heating bill.

The joy of form

You do not buy windows off the rail. They are individually made products of craftsmanship, tailored to blend in perfectly with the architecture of your house. That's why VEKA profile systems are made to be especially versatile. They come in a huge range of frame and casement profiles with a complete line of accessories,

giving you full creative freedom in realising your ideas. Choose from our classic white or coloured portfolios, add interesting details like georgian bars, or incorporate special forms – round or arched windows, triangular, gable or bay window constructions. The possibilities are endless – express your own personal style.

The VEKA System with the

- 1 **The linear design** with its bevelled contours gives the TOPLINE system its striking appearance
- 2 **Best thermal insulation** of up to $U_w = 1.0 \text{ W/m}^2\text{K}$, depending on the type of glazing, significantly reduces heating costs
- 3 **High-quality gaskets** in elegant grey – the twin seal gaskets reliably keep cold, draughts and damp at bay
- 4 **Galvanised metal reinforcement** in accordance with VEKA reinforcement guidelines guarantee stability and long-lasting functionality
- 5 **5-chamber profile** with 70 mm standard installation depth makes optimum use of the insulating effect of air

recessed

bold design

Energy and cost savings

The 5-chamber technology of VEKA profiles keeps heat loss to an absolute minimum. It reduces energy consumption

and keeps your heating costs low.

Perfect atmosphere

The excellent insulating properties of VEKA profiles minimise the temperature differences in your living space and

ensure maximum comfort in your home. The extremely reliable gaskets is a high-performance barrier against cold and draughts.

Increased security

Depending on their position and accessibility, windows need to fulfil a number of different security requirements. Special fittings, security

glazing and handles can be fitted according to customer requirements to make VEKA profiles burglary-resistant.

Best noise insulation

Noise exposure is more than just an annoyance, it can damage your health.

Even standard windows made with VEKA

profiles significantly reduce external noise, and are upgradeable to conform to the lowest sound transmission class.

Colour range

Coloured window frames and doors are a reflection of your individual character.

With a portfolio of over 30 different

colour hues and wood finishes, we offer individual solutions for every taste and architectural style.

Valuable investment

New windows are a worthwhile investment which increases the value of your property. The durable surfaces

of VEKA's high-quality profiles remain attractive for many years. They are easy to clean and never need to be painted.

More comfort for your own four walls

To come home, put your feet up, unwind – there's nothing like it. Home is where we forget the stresses of our working day and relax. It's the central point of our life: a place that feels safe and secure, where we find peace and quiet, a place for the family. In order to make your home that comfortable

haven, many details have to be just right. Windows are an important factor. They light up the interior, protect you from wind, weather and noise and ensure your living environment is just how you want it to be – any time of the year.

We'd love to tell you more!

Profile system
